ARIZONA SUPER HIGHWAYS

INVESTOR & PARTNER DECK · 2026

The Physical-to-Digital Cannabis Directory & Loyalty Ecosystem

A pocket passport that drives verified foot traffic — backed by a live map, Dutchie ordering, and an encrypted community app.

PRINT + APP | DUTCHIE POS | ANCHOR: MEDUSA FARMS

Launch model: Medusa Farms · 3490 N Bank St, Kingman, AZ · medusafarms.com

Cannabis retail is great at product. Terrible at discovery.

01

Ad bans

Meta and Google restrict cannabis advertising, so dispensaries pay a premium for every new customer and can't build reach.

02

Loyalty fatigue

Every chain has its own app. Tourists won't install five of them, and locals ignore push notifications from an app they open twice.

03

Paper dead-ends

Printed maps can't show live menus, can't take an order, and can't prove ROI to the advertiser who paid for the page.

The gap: Arizona has 160+ dispensaries and a massive Route 66 tourism corridor, but no shared passport that turns a road trip into measurable, repeat business.

02 · THE SOLUTION

One passport. Every highway.

A collectible pocket magazine plus a companion app — designed so the print piece earns the download, and the app proves the print piece works.

PHYSICAL

The Pocket Passport

- 3.75″ × 5.25″ saddle-stitched booklet
- Region-by-region dispensary + wellness directory
- Ink stamp boxes and signed QR check-ins
- Brand, event, treatment center and workshop ads
- Sold at $19.99 and distributed free at partner counters

DIGITAL

The App & Live Map

- Geo-located map with real-time menus
- Passport stamps, tiers, and reward wallet
- Dutchie ordering with closest-location routing
- Social feed, reviews, and live event streams
- End-to-end encrypted member/business messaging

1 Scan in

2 Earn stamps

3 Unlock drops

4 Order & route

Built, clickable, and demo-ready.

WORKING PROTOTYPE

Interactive app demo

Live map, check-in, tier progress, Dutchie menu with cart, AZ tax estimate, encrypted feed, and event streaming UI.

PRINT PROTOTYPE

Pocket passport PDF

Eight-page, print-ready trim-size booklet with Medusa Farms as the featured stop, stamp boxes, tier ladder, and QR codes.

TECHNICAL SPEC

Architecture & integration

Data models, API surface, QR signing, order-routing logic, Arizona tax engine, and partner agreements.

DEMO MODEL

Medusa Farms

3490 N Bank Street, Kingman, AZ 86409 · (928) 421-0020 · medusafarms.com

- Open since 2018 · recreational + medical
- Everyday savings: $13 / 3.5g, $80 / oz, $15 / 1g concentrates
- Dutchie-menu compatible for live ordering
- Anchor of the Western / Route 66 district

All screens and print pages in this deck are populated with Medusa Farms as the launch partner.

From paper to purchase.

1. **Discover**
   Traveler picks up the passport at a hotel, dispensary, or event. Every listing has a signed QR code.
2. **Check in**
   Scan at the counter. The app verifies the signature, adds a stamp, and awards points instantly.
3. **Unlock**
   Tier-gated offers, BOGO deals, swag, and hidden drops appear in the wallet based on stamps collected.
4. **Order**
   Cart routes to the closest partner with live Dutchie inventory. Taxes calculated for that jurisdiction.
5. **Return**
   Points, badges, reviews, and event invites pull the member back — to this store or the next stop on the highway.

Attribution loop

Every printed page has a unique code, so the partner sees exactly which placement produced the visit.

Printed QR scans	Tracked per page
Check-ins	Stamp + timestamp
Offer redemptions	Rotating code
Routed orders	Dutchie order ID
Return rate	Member cohort

Partners receive a monthly dashboard; members are never exposed as PII.

05 · MARKET

A $1B+ market with no shared passport.

$1.4B
Est. annual Arizona cannabis sales

165+
Licensed dispensaries statewide

$500M+
Serviceable loyalty + local ad spend

Why Arizona, why now

- Route 66 and I-40 tourism funnel through Kingman and Flagstaff
- Rec market is mature; operators compete on retention, not novelty
- Advertising restrictions make owned channels and print newly valuable
- Dutchie is already the POS for a large share of stores — ordering is a plug-in, not a build

Who we serve

- **The road tripper** — plans stops, chases stamps and drops
- **The local regular** — maximizes tier perks and event access
- **The connoisseur** — reviews, limited drops, workshops
- **The operator** — foot traffic, attribution, and an owned audience

Market figures are directional estimates for planning; validate in diligence.

06 · BUSINESS MODEL

Four revenue lines, one audience.

STREAM	PRICE	WHAT THE PARTNER GETS	SHARE OF Y1 REVENUE
Headline sponsor	$3,500 / mo	Cover logo, exclusive drop slot, live-stream sponsorship	45%
Highway tier	$1,500 / mo	Full print page, featured Dutchie integration, push	25%
Base directory	$500 / mo	Listing, map pin, one offer	15%
Booklet + routing	$19.99 cover · 3% of routed subtotal	Resale margin + order attribution	15%

Recurring first
Sponsorships are monthly and annual — predictable revenue before a single guide is sold.

Print is the moat
Competitors can copy an app. They can't copy a distributed physical passport with signed attribution.

Routing compounds
Every order teaches the router which stores convert, improving placement value each month.

07 · UNIT ECONOMICS

The pilot pays for itself at 6 partners.

Print run · 10,000 guides

Design + prepress	**$6,000**
Print (80lb text, soft-touch cover)	**$18,500**
Foil stamp + rounded corners	**$3,500**
Distribution + freight	**$4,000**
Total	**$32,000**
Cost per guide	**$3.20**

Cover price $19.99, partner resale split 40/60. Ad revenue is the primary return; booklet sales offset print.

Per-partner economics

Average sponsorship	**$1,500 / mo**
Target partners, month 12	**50**
Sponsorship MRR	**$75,000**
Routing revenue (est.)	**$8,000 / mo**
Booklet margin	**$6,000 / mo**
Gross monthly	**$89,000**

Illustrative. Assumes 50 partners, 2,500 routed orders/month at $55 average subtotal, and 1,000 guides sold.

Start on Route 66. Expand by corridor.

PHASE 1 · MO 1–3

Kingman pilot

Medusa Farms anchor. 100-guide print run. Beta check-in at the counter and one live workshop.

PHASE 2 · MO 4–6

Western corridor

5–10 partners across Kingman, Bullhead City, and Laughlin-adjacent traffic. Add delivery routing.

PHASE 3 · MO 7–9

Northern AZ

Flagstaff, Prescott, Sedona. Tourism-heavy stops, event and workshop programming.

PHASE 4 · MO 10–18

Statewide

Phoenix metro, Tucson, Yuma. 50+ partners, 5,000+ members, first regional expansion study.

Distribution

- Partner counters and hotel concierge desks
- Tourism centers, visitor bureaus, and Route 66 attractions
- Events, workshops, and brand pop-ups
- Direct mail to passport members before peak travel season

Launch motion

- Anchor deal with Medusa Farms as proof of concept
- Free 90-day pilot for the next 3 partners
- Publish pilot results as the sales deck
- Referral fee for partners who bring in other partners

09 · WHY WE WIN

Distribution, not just software.

Physical moat
A printed, distributed passport with unique signed codes can't be cloned by an app competitor overnight.

Shared network
One passport works across competing stores — that's the reason a traveler installs it and the reason stores join.

Order routing data
Every routed order improves our map of real demand and inventory, which makes placement more valuable each month.

Compliance-native
21+ gates, no in-app cannabis payments, aggregate-only reporting, and ad review built in from day one.

Tourism positioning
"Super Highways" owns a story no dispensary chain can claim: the Arizona road trip.

Local trust
Launching with a respected Kingman operator gives us credibility with the next 50 partners.

Prototype complete. Pilot next.

Done

- Interactive app prototype (map, check-in, menu, cart, feed, events)
- Print-ready pocket passport PDF
- Technical architecture and data models
- Arizona tax engine + Dutchie routing reference code
- Partner sponsorship agreement and tier structure
- Medusa Farms demo model and listing content

Next 90 days

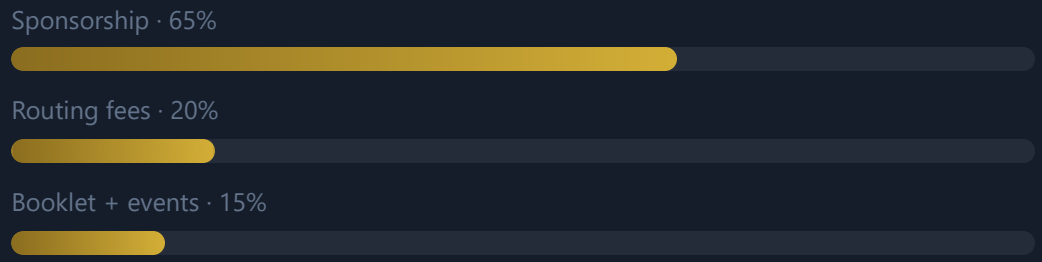

- Sign Medusa Farms as anchor partner
- Print 100 pilot guides
- Run a 6-week check-in beta with real customers
- Onboard 3–5 additional Kingman-area partners
- Connect a live Dutchie sandbox store
- Publish pilot metrics and open the seed round

6 wk	100	5	1
Pilot length	Guides printed	Target partners	Live Dutchie store

Conservative, sponsorship-led.

YEAR	PARTNERS	MEMBERS	REVENUE	EXPENSES	NET	PRINT RUNS
Year 1	50	5,000	$246K	$190K	+$56K	2
Year 2	150	25,000	$780K	$460K	+$320K	5
Year 3	300	75,000	$1.9M	$1.0M	+$900K	10

Revenue mix at scale

Key assumptions

- Average sponsorship grows from $1,500 to $1,900 with tier mix
- Routing attach rate 20% of active members, $55 average order
- Print cost declines 12% per run at volume
- No outside capital required for Year 1 pilot

Illustrative projections for discussion. Validate with actual partner contracts.

12 · COMPLIANCE & TRUST

Built for ADHS from day one.

Regulatory posture

- 21+ age gate in print, web, and app
- No cannabis payment processing inside app-store wrappers
- All advertising reviewed against Arizona cannabis marketing rules
- Partner license verification before listing
- No medical claims; education-first content

Data & security

- Age/ID verification via a third-party provider
- Signal-style end-to-end encryption for member messaging
- Aggregate-only reporting to partners — no member PII
- Signed, single-location QR codes to prevent fraud
- Audit logging for redemptions and routed orders

Positioning: Arizona Super Highways is a directory, loyalty, and discovery platform — not a retailer. Orders route to licensed partners, and payment happens in their compliant flow.

13 · THE ASK

$250K seed to prove the corridor.

Use of funds

Print run + design (10,000 guides)	**$75K**
App build-out + Dutchie integration	**$95K**
Launch marketing + distribution	**$50K**
Legal, compliance, working capital	**$30K**
Total	**$250K**

Milestones this round buys

- Signed anchor + 10 paying partners
- 10,000 guides in market
- 2,000 activated passport members
- Live Dutchie ordering in 3 stores
- Pilot data set for the Series A story
- Repeatable partner playbook for corridor 2

$250K
